

ORANGEHRM

THE WORLD'S FIRST

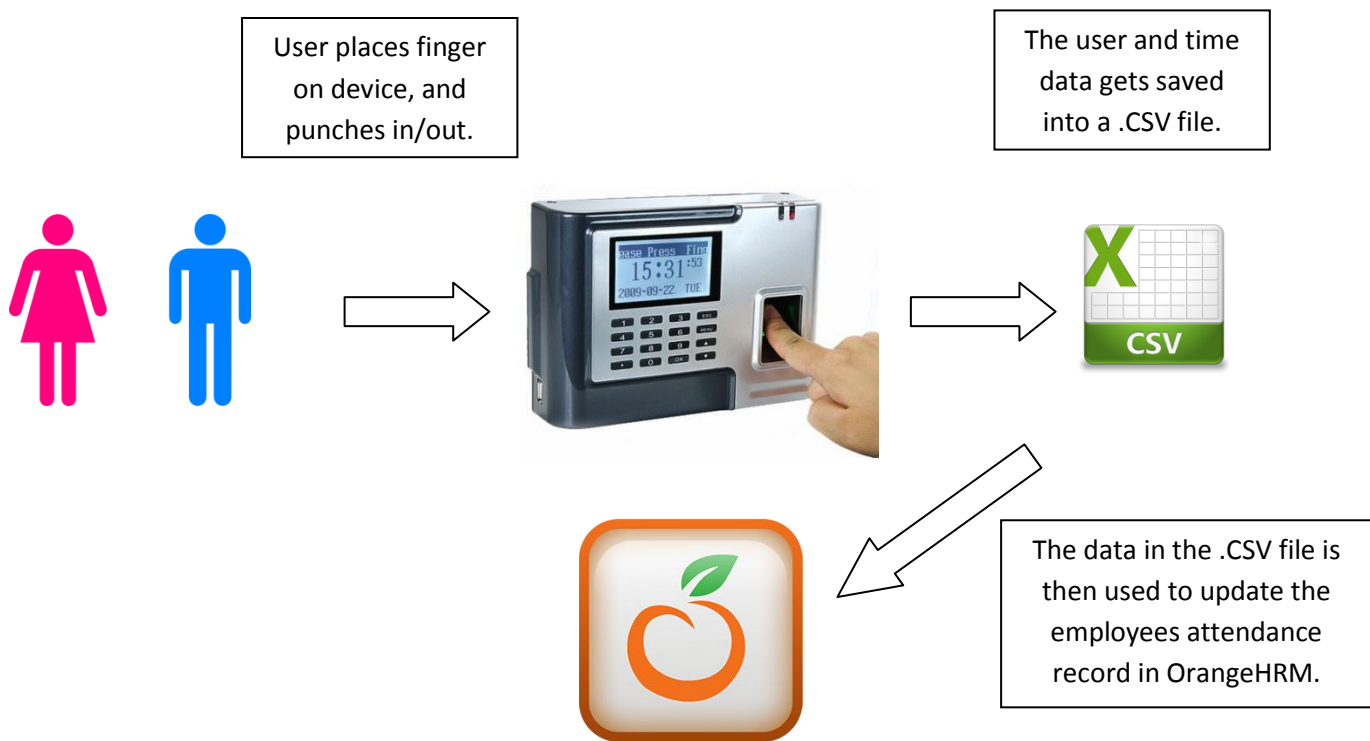

HR App Store

- *Fingerprint scanning add-on for easy punch-in and punch-out.*
- *Removes the need for employee access cards, passcode entry, etc.*
- *Allows employees to punch-in and out multiple times reducing the need to enter complicated passcodes or swipe their access cards.*
- *All data recorded can be used for attendance record generation.*
- *Automatic email notifications can be enabled to be sent to both the employee as well as the HR Admin.*

There are three methods of uploading this punch-in and punch-out data:

- *Real time sync; every time a user places his finger and punches in or out, the data is instantly captured by the OrangeHRM system.*
- *Customer uploads a CSV onto the OrangeHRM system, either daily or weekly (depending on requirement)*
- *OrangeHRM can be programmed to go and pick up the customers CSV file with all the punch in and punch out data at programmed intervals.*
